Mission

I am a passionate software developer and I'm looking for an organization where I can contribute and learn. I am resourceful and truly believe it's not what you know but how you approach problems. I know that being a developer is a lifelong commitment to learning and I enjoy researching problems and learning new languages, design patterns and frameworks.

Skills/Technologies

React, Node, Express, Mongoose, jQuery, MongoDB, Processing, Git, GitHub, AWS.

Background/Education

MSU Denver – Bachelor's Degree - Public Relations - 2017

Advanced Web Developer's Bootcamp 2019 - Colt Steele
After completing Colt Steele's Web Developer Bootcamp, I jumped straight into the advanced version. This online bootcamp gets in to the heavy parts of web development. The instructors teach the ins and outs of React and the purpose of state. It also explained the convenience and power of JavaScript ES6 and later editions. Throughout the course, I've completed several exercises and projects that test true knowledge of higher order functions, tools like redux within react, how to connect the backend to react and deploy!

Recent Project

Organizer App - Full Stack MERN App
Built an organizer app from scratch with no date picker libraries. The app was built using React on the front end and node, mongoose, express and mongo on the back end. Creating the logic and algorithms were fun and challenging. Lastly I set up all the routes on the back end to feed the data to the React state. Check the code at my GitHub https://github.com/Jeilani/OrganizerApp

Work History

Security Professional - Allied Universal - August 2018 - May 2019
Involved usage of security software to ensure that safety was maintained in all areas. The primary responsibility was to make sure that every person in and out of the building was accounted for.

Guest Services Team Lead - Sheraton Hotel - February 2015, May 2018
Coordinated staff to greet guests upon entry and inquire on whether guest would need luggage services/vehicle accommodations.
This position required leadership and morale building with team.

Public Relations Intern - JKD & Company - Feb 2017 - Jun 2017
During my time at this internship, my daily responsibility was to create media pieces for clients. I accomplished my goal of having one of my works published with a press-release that was published on YourHub. Most of the media pieces were created in the Adobe suite with InDesign and other design applications like Photoshop.This position also involved heavy interactions with clients and reporters to get acquainted with roughest part of PR.
